Advanced Digital Printing

Data Provided by Tru-Steel HD

Tru►Steel HD® digital printing technology has high-resolution images of natural materials that are printed directly to the steel sheet using a large-format digital printer. The result is stunningly realistic, allowing the end users to entirely replace wood, stone, or vinyl siding with this durable steel product without compromising on appearance. Total Advantage: with the process perfected by SDI, streamlines the supply chains to reduce cost, control quality, and increase value over time!
